

True Potential UBS Cautious

Objective and Investment Policy

The Fund aims to achieve growth over the long term (5 years or longer) through active management of a diversified investment portfolio whilst seeking to control the overall level of portfolio risk.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

To reflect the cautious nature of the Fund, 25% to 65% of the Fund will be invested in assets which are considered higher risk. Higher risk assets include domestic and international equities, property, commodities and absolute return strategies. Exposure to these assets will be achieved indirectly through collective investment schemes (this may include collective investment schemes managed by the investment manager or sub-investment manager), listed securities and derivatives.

The Fund may also invest directly or indirectly in: Bonds (issued by governments and other organisations), cash, deposits and money market instruments (investments usually issued by banks or governments that are a short-term loan to the issuer by the buyer).

The Fund may use derivatives (a financial instrument whose price is dependent upon or derived from one or more underlying assets) for Efficient Portfolio Management (EPM), i.e. to protect against market or currency movements, to reduce costs, or to earn income or capital. The Fund may also use derivatives for investment purposes.

There are no geographical restrictions on the countries of investment.

You can buy and sell shares on any working day in London, excluding UK public and bank holidays.

The Benchmark for this fund is Morningstar UK Moderately Cautious Target Allocation, this is a Comparator Benchmark. The benchmark may be used as a guide to compare and assess the performance of the Sub-Fund. Our aim is to help you monitor how your investment is performing. The Manager believes this is an appropriate comparator benchmark, given the multi-asset nature and relative risk profile of the Sub-Fund. The Sub-Fund does not use the benchmark as a target, nor is the Sub-Fund constrained by it. The mix of assets in the Sub-Fund may vary from those of the benchmark (and its constituents). Accordingly, it should be used for reference purposes only.

This fund may invest principally in collectives. Further information can be found in the True Potential OEIC 1 Prospectus available at www.truepotential.co.uk/documents/

Ongoing Charges Figure (OCF)*: 0.59%

There are no entry or exit charges.

Launch Date: 10 August 2016

Risk Profile: Cautious

The Cautious Investor may be sensitive to short-term losses. A Cautious Investor's potential aversion to losses could compel them to shift into a more stable investment if significant short-term losses occur. A Cautious Investor is usually willing to accept somewhat lower returns in order to lower their exposure to risk.

Why True Potential UBS Cautious?

The True Potential UBS Cautious Fund is sub-managed by UBS Asset Management (UK) Ltd.

The True Potential UBS Cautious Fund provides a diversified fund designed to provide the opportunity for capital growth and income through diversified exposure, directly or indirectly, to global equity and fixed income markets.
